

Upgrade to Watson Knowledge Catalog (WKC)

nFolks: Proven Experts in Data Governance

Free Governance Assessment

We evaluate your current setup and identify opportunities tailored to your use case and CP4D migration. An assessment report is delivered to you.

Full Governance Service

We facilitate exporting assets from InfoSphere Information Governance Catalog (IGC) and importing to Watson Knowledge Catalog (WKC), with automation to accelerate the process.

The nFolks Mission

We are committed to deliver customer success with deep expertise and innovative minds.

nFolks is Trusted by IBM Expert Labs! We get it done!

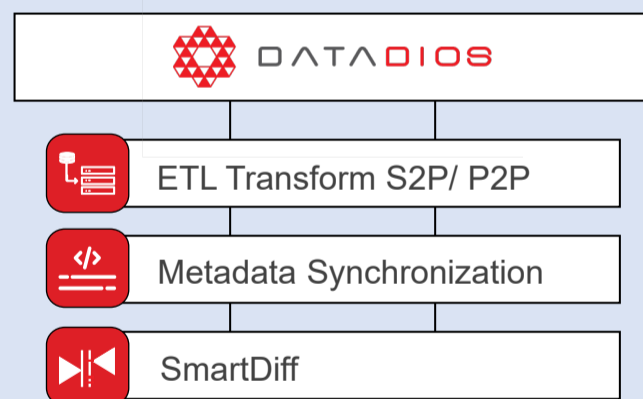

Governance Modernization Options

- Migrate from legacy InfoSphere Information Server to IBM Cloud Pak for Data.
- Move from your On-Premise environment to a fully functional Cloud-native solution.
- Consolidate Data Governance deployments in your data center by migrating governance framework and artifacts from multiple systems into a single application.

The nFolks Services Team Delivers!

Our services team excels at skillfully handling complex governance projects. Our flexible sandbox, packed with a wide range of third-party tools, replicates complex customer landscapes. nFolks removes sales barriers with our MVP offering while addressing customers' complex environments and legacy systems. We have demonstrated success in upgrading, migrating, and modernizing governance assets with our services offering. A customer's confidence in the migration or competitive replacement is bolstered with our software tools and automation approach.
