nFolks redefines cutting-edge innovation with 20 patents in the domain of data integration and data movement

We take pride in successfully building and delivering training assignments that others may find daunting.

IBM PARTNERS

nFolks partners extensively with IBM Expert Labs. We not only deliver IBM-built training courses globally, but also build our own training content for customers and partners.

ASSESSMENT

Training needs are assessed, and a personalized plan is designed to best address the requirement.

CERTIFICATION

We are working on providing badges and certifications to users that successfully complete a quiz / assessment after attending our training programs.

STAY UP TO DATE

We constantly update our content and build new training content to be able to train customers and partners on latest applications and technologies.

Specialists In Cp4d, Wkc And Datastage Trainings

We have successfully delivered many training assignments in the Cloud Pak for Data space. We were the first to build training content and deliver trainings on Watson Knowledge Catalog and DataStage on CP4D.

The nFolks Approach

To be able to support our customers to the best of our ability, we engage multiple proctors in a training assignment along with an instructor, so the participants can work with proctors if they need additional apart from what is being covered by the instructor.

CONSULTING

We not only deliver trainings but also support any consulting or development engagements. We have a strong SME team of highly skilled and certified data engineers, solution architects, platform administrators, and data scientists that can help you rapidly adapt to Cloud Pak for Data.

CP4D Installation and Upgrades with nFolks Services

We are uniquely positioned to help you achieve your goals of CP4D installation or version upgrades by providing our expertise to reduce risks involved thereby increasing overall confidence.

Our Administration specialists will assess your request and determine the level of automation that can be used for your specific deployment model to accelerate installation of CP4D.

We support end to end administration which includes installation, upgrades, applying of patches etc required for the CP4D platform to be functional.

Cloud Pak for Data is a powerful platform that can help organizations derive valuable insights from their data. However, installing and configuring the platform can be a complex and time-consuming process. We at nFolks can help in such instances:

- First, our team will work with the client to understand their specific business needs and data requirements. This allows the customer to design a customized solution that leverages the full capabilities of Cloud Pak for Data.

- Next, our team will handle the installation and configuration of the

- platform, ensuring that it is optimized for the client's unique

- environment. This includes setting up the necessary hardware and software, as well as integrating with any existing systems the client may have in place.

- Once the installation is complete, our team provides comprehensive training and support to ensure that the client's staff is fully equipped to use Cloud Pak for Data effectively. This may include training on data management, analytics, machine learning, and other

Furthermore, our company can offer ongoing support and maintenance to ensure that the client's Cloud Pak for Data installation continues to meet their evolving business needs. This may include regular updates, performance monitoring, and troubleshooting services.

By partnering with our company for Cloud Pak for Data installation,clients can gain substantial access to a powerful data analytics platform that is tailored to their unique needs and optimized for maximum performance. This results in making better, data-driven decisions and gaining a competitive advantage in their industry.

Why work with the nFolks team

nFolks has a team of highly skilled and certified engineers, architects, administrators, and data scientists who are all highly motivated and experienced in installation of Cloud Pak for Data. Our expertise with Product Engineering and our experienced administration team will include automation as needed in the installation or upgrade activities.

We provide automation for installation of Cloud Pak for Data and also we are capable of integrating all the services which are a part of Cloud Pak for Data which makes us stand apart from the crowd.

We provide support and maintenance services for Cloud Pak for Data, including software updates, security patches and technical assistance. Our services include administration of Cloud Pak for Data as well as the Openshift administration, an all-inclusive support for managing and monitoring the Openshift cluster and disaster recovery assistance. The installation is also based on the custom requirements given by the customer as per their infrastructure needs.

Installation Scenarios

- Installation on all the major cloud platforms like IBM cloud, AWS, Azure etc.

- Multitenancy Support

- Integration of the services like DB2, DataStage Nextgen, WKC , Cognos etc as per the customer requirements

- Migration from the legacy or on-prem environments to Cloud Pak for Data.

- Administration monitoring like pod status, health checkup, and disaster recovery.

- Migrate your Data Integration, Data Quality, Data Analysis, Data Virtualization, Data Governance solutions onto Cloud native applications.

OTHER SERVICES AVAILABLE

- Installation Upgrade
- ETL migration to cloud
- Health check
- RDBMS /IGC to WKC conversion
- Impact Analysis
