

We Specialize in DataStage Modernizations

Convert your Server jobs to Parallel jobs (S2P)
Upgrade your Parallel jobs by replacing legacy stages (P2P)
Upgrade to DataStage NextGen

DataStage upgrade done, right!

We provide comprehensive support for end-to-end modernization, including Server to Parallel conversions, Parallel to Parallel conversions, and the development of all necessary components to enable the code to operate on CP4D.

DataStage upgrade faster!

nFolks products and services streamline, expedite, validate, and mitigate potential risks during the overall modernization process.

The nFolks Mission

We are dedicated to ensuring customer success through our profound expertise and innovative thinking.

nFolks is Trusted by IBM Expert Labs! We get it done!

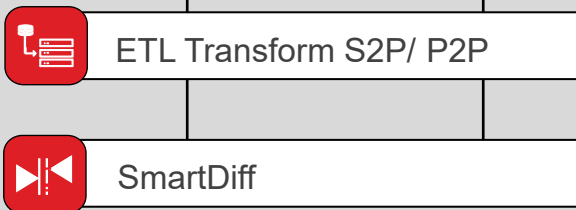

ETL Modernization Options

- Migrate from legacy InfoSphere Information Server to IBM Cloud Pak for Data.
- Move from your On-Premise environment to a fully functional Cloud-native solution.
- Remediate your ETL as part of your overall modernization strategy involving migrating to a data warehouse or a data lake service in the cloud.

The nFolks Services Team Delivers!

Our services team excels at skillfully handling complex DataStage modernizations. Our flexible sandbox, packed with a various third-party tools, replicates complex customer landscapes. nFolks removes sales barriers with our MVP offering while addressing customers' complex environments and legacy systems. We have demonstrated success in migrating difficult DataStage legacy assets with our services offering. A customer's confidence in the migration or competitive replacement is bolstered with our software tools and automation approach.
