OpEx Savings with Watsonx.data

nFolks: Experts in Watsonx.data

Get started with cost savings by moving selected workloads to Watsonx.data

A workload assessment to showcase potential operational expense savings by moving expensive workload to Watsonx.data involves a detailed analysis of current systems, projecting the potential efficiencies and cost savings achievable with the transition.

The nFolks Mission

We are committed to deliver customer success with deep expertise and innovative minds.

nFolks is Trusted by IBM Expert Labs! We get it done!

nFolks can help you with a Cost-Benefit Analysis:

- **Savings:** Calculate the potential savings in operational expenses, such as reduced hardware costs and maintenance.
- **ROI:** Estimate the return on investment over a defined period post-transition to Watsonx.data.

nFolks can discover the specific workloads for you with our nFolks Data Accelerators software specially purposed for this task.
